Air Land Conquest 2026
Swarm Dance Programming Rules_V2_ April26

I. Requirements

Team, Age and School Requirements	
Team Members	Up to 5 members. No cross-registration.
Age Requirements	8 years old to 18 years old
School	MOE stipulated schools
Drone Requirements	
Drone Brand And Model	Highgreat Hula (provided by organiser)
Safety Protection	At least semi-enclosed guard
Positioning	Visual recognition
Programming Software	Hula App Graphical (3D preview supported) or Python
Lighting	Programmable
Equipment Requirements	
Programming Equipments	Students are to bring their own programming equipment (with WIFI capabilities) installed with all required software. Drones, wifi router and etc will be provided by 65drones during the competition.

II. Competition Format

Two stages format: Programming and live demonstration by at least 4 team members of a swarm dance within a space of 5 meters (width) x 5 meters (breadth) x 2.5 meters (height). Recommended Max XYZ to be 3m by 3m by 2m , to buffer deviation .

- **Programming:** 60 minutes on-site programming based on task cards and creativity. Task cards will only be announced on the day of competition. Teams are to pick at least 2 task cards out of the 6 task cards.
- **Live Demonstration**: 10 minutes of demonstration flight with music using the programmed code. 10 minutes includes setup time. Music must be positive; edits must be from the same track.

- Each mentor is allowed to assist in the preparation stage to assist for (up to 5 minutes), until drones take off.
- 1 student mentor is allowed per team

Student mentor (NEW)
Criteria for student mentor

1) Student mentor must not be taking part in the Air Land Conquest 2026 (any category).
2) Student mentor must be an alumni or existing student of the same school with the team (to be verified by the teacher).
3) Student mentor must be an existing student in any educational institution and below the age of 24 years old. (verified by valid student/ matriculation pass)
4) Student mentor must not be a paid external trainer , engaged by the school (as verified by the teacher in charge)

Student mentors will receive certificates of recognition and medals of recognition .Medals of varying recognition depends on the quantitative performance of the mentored team, as well as qualitative performance such as teamwork as observed by judges during their competition round.

-

III. Scoring Criteria

Total score = Programming (20 pts) + Live Demo (100 pts)

Programming Score (20 points)

- Take-off within time = 20 points
- If no drone airborne within 10 minutes, 20 points for showing simulation proof of programming code.

Live Demo Scoring (100 pts)

Criteria	Details	Max Points
Duration	50–120 sec required	> 120 seconds: 20 points 50 - 120 seconds:

		(((120 - duration) / 120) * 20) points
Drone Count	7: 7 pts, 8: 9 pts, 9: 12 pts	9 drones - 12 points 8 drones - 9 points 7 drones - 7 points
Successful demo of patterns Score	6 total (2 from task card, 4 creative), 8 points each	48
Creativity	Transitions, dynamics, lighting	20
Music Match	Movement sync with music rhythm	10

A run of live demo ends when all drones land.

IV. Penalty

- No drones taking off after prep = 0 score for live demo scores
- Incomplete task card movements = no score for that part.
- Unauthorized items = disqualification.
- Cheating, or incomplete team = disqualification.
- Manual piloting or drone is touched during demo = disqualification
- Drones beyond 5 meters (width) x 5 meters (breath) x 2.5 meters (height) = disqualification.
